

EXHIBITION

FASCINATION OFFSHORE WIND ENERGY

touring
across the
North- and
Baltic Sea

A public acceptance initiative for offshore wind energy

Discover the fascination of offshore wind energy!

An exhibition installed on a ship –
Bringing offshore wind energy to the people!

More than 20,000 visitors from June to August 2009 – and the tour continues in
the summer of 2010 and 2011!

Tour

- Shown at the most visible and attractive places on the coast – major touristic locations and places affected by offshore wind energy
- Presented in connection with local harbour events
- Continuation of exhibition in summers 2010 and 2011 including visits to neighbouring countries

Exhibition Design

Interactive exhibits and a variety of audiovisual elements as well as demonstrative models of offshore wind energy equipment add to the attractiveness of the exhibition. A feed-back section and a quiz about offshore wind finalize the exhibition circuit

Exhibition content and structure

- Why Offshore Wind - Climate Change & Renewables
- Technology and Development of Offshore Wind Energy
- Infrastructure and Grid Integration Economic aspects
- German test site „alpha ventus“

The exhibition is part of the EU-funded POWER cluster project „The Northern European Competence Network for Offshore Wind Energy“. Within this international project the Foundation Offshore Wind Energy works together with neighbouring countries to increase offshore wind energy development and its social acceptance.
