

Efficient and effective logistics facilitate competitiveness for businesses in Skaraborg and create jobs!

FALKÖPING

– A hub with traditions

Falköping has a 150 year old tradition as a hub for rail-based transportation. Skaraborg Logistic Center is a continuation of this tradition.

Today, there are two open-access intermodal and two dedicated round-timber terminals (Stora Enso/Sydved and Södra). The terminals are also surrounded with a logistics park, including services for vehicle and rail wagon maintenance.

Vehicle and rail wagon service and maintenance is established around.

Den svenska Trafikverket utvecklar, äger och sköter järnvägsinfrastrukturen och trafiken i Sverige. Trafikverket ansvarar för järnvägsinfrastrukturen och trafiken i Sverige. Trafikverket ansvarar för järnvägsinfrastrukturen och trafiken i Sverige.

Skaraborg Logistic Center's intermodal terminals are operated by TBN's Åkeri AB. The terminals handles part-loads, containers, swap-bodies and trailers. A Dry Port concept is under development and implementation at the terminals.

A Dry Port is an inland intermodal terminal where there is a direct and frequent link by rail to and from a seaport.

The Dry Port then functions as an inland port with the same services and functions as the seaport.

There are great opportunities for business establishments within Skaraborg Logistic Center and its new 40 hectares Logistics Park. The Logistics Park and its connecting infrastructure have been designed based on efficiency, sustainability and future expansion possibilities in line with customer and market demands.

Falköping is strategically located for timber-related and biofuel operations and associated businesses. Stora Enso/Sydved and Södra have both established round-timber terminals at Skaraborg Logistic Center.
