Tåsinge Plads: The 'winter city', lightning project, concerts etc.

Aim + goals:

To test different activities at the square: urban gardening, children activities, live music, new traffic situation, new lighting, new outdoor furniture etc. To get the citizens actively involved in the programming of the permanent square. Finding the right balance between activities.

Lessons:

Use temporary activities as involving strategy. Use many different forms - one suit does not fit all It is one to one live testing, is interesting, it is visible.

2. Kildevældsparken

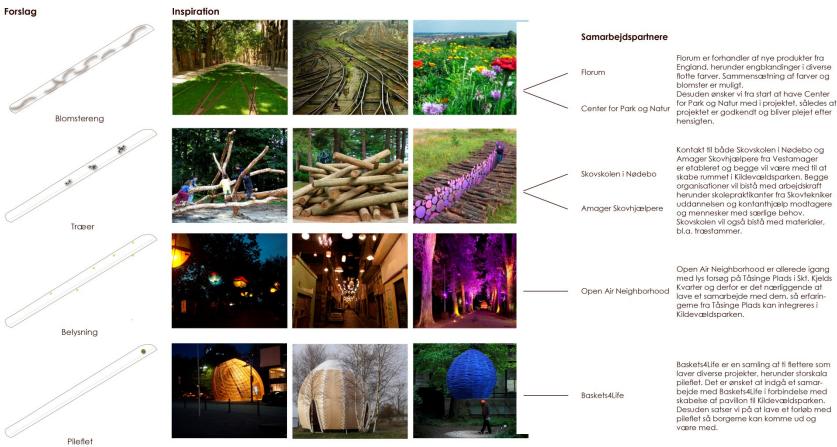

Kildevældsparken

Kildevældsparken: Temporary activity area

Kildevældsparken: Temporary activity area

Aim + goals:

Create an activity area for children 13-17 years: First temporary, later more permanent

Lessons:

We were ready to move —but the park is protected area —by regulation (cultural and natural heritage). Project must go through a new development plan and approval from city council.

Check for restrictions in area, even though it seems ordinary and uncomplicated...
