- ▶ **Pilot Photobook**
- ▶ **Temporary use of agricultural land taken out of production for road construction (A11) in an harbour area.**

**VLAAMSE
LAND
MAATSCHAPPIJ**

**The Interreg IVB
North Sea Region
Programme**

Reporting period April 2013

with the plantation on site, an information board was put out, the SEEDS logo was put on this board, even though these permanent investments are not financed by SEEDS; we wanted to communicate and get the surroundings familiar with the logo and the project.

Reporting April 2014

Reflection days

Vlaanderen
is open ruimte

Reporting April 2014

Archeological survey

Reporting April 2014

Groundbreaking ceremony start building A11 on site (March 28th 2014)

Reporting October 2014

Examples of agricultural roads cut off due to the construction of the A11

Reporting October 2014

Examples of small and irregular plots due to the construction of the A11

Reporting April 2014

Examples of farmers getting isolated from the public road due to the construction of the A11

Reporting October 2014

Examples of water channels (ditches) cut off due to the construction of the A11
due to the construction of the A11

Reporting October 2014

Example of a new farm that has been built

Reporting April 2015 – construction board

Reporting April 2015 – new drainage canals

Reporting April 2015 – filling up ditches (due to rearranging use of the plots)

Before filling up the ditches, the ditches needed to be reamed

Reporting April 2015 – new roads / accesses

New accesses to farmers plots

New public roads

Reporting April 2015 - new crossing possibilities

New crossing possibilities
alongside the country roads

Reporting April 2015

Roads to be broken down

Part of private garden becomes a new farmers plot

Reporting June 2015

New access roads to farms or plots

Reporting June 2015

New canals and ditches,
New infrastructure linked to canals and ditches

Reporting June 2015

Process of filtering the ground; clean remains are re-used on site, waste is prepared for transport

Process of filling up ditches to enlarge the plots or to rearrange the plots

Reporting June 2015

Plots being prepared for agricultural use, process of levelling the fields

Existing road broken down during the project

Reporting June 2015

New road and ditches at the back of the picture, road in front of the picture is linked to the highway infrastructure (not financed by SEEDS)

VLM study tour 2015 June 19th

Buffering bank and new didge

New plot in transition phase from acer
To graass + new fence

New road and new didges (at the back of the picture)

VLM study tour 2015 June 19th

New dike and bank

Means of transport
