VITAL RURAL AREA

Vital Rural Area is a European co-operation project (2009-2014) of 13 project partners from six North Sea countries on the reinforcement of rural areas. The central part of the project is formed by the Rural Power Pack, a general working method for sustainable regional development built up along a large number of best practice pilot cases. This Rural Power Pack offers an interactive toolbox to be applied in other regions throughout the EU27.
