National broadband plan & upcoming BIPT actions

- Project Atlas
 - Detailed geo-location of networks in Belgium
 - Enhance transparency for the customer on network performance
 - Identify white spots and propose solutions
- Review of market analysis on access to DSL- and cable-networks in coordination with media regulators via CRC
 - Stimulate competition (at network and service level)
 - Stimulate fibre deployment without foregoing on competitive dynamics
- Monitoring of 4G roll-out obligations on 800 MHz band
- Analyse switching problems on fixed networks and propose measures to facilitate switching process
- Support and implement adoption of EU rules on cost reduction measures for roll-out of broadband
- Anticipate on new forms market power that could inhibit broadband development
