WELKOM BIJ FRYSEPS

Fryseps is de werknaam van een breed samenwerkingsverband van verschillende organisaties uit Friesland om innovatieve toepassingen van fotovoltaïsche (PV-) zonne-energie te ontwikkelen voor en door Friese bedrijven en instellingen.

Doel is de versterking van de Fries economie en kennisinfrastructuur én de ontwikkeling van Friesland en de Waddeneilanden tot een gebied met kennis en toepassing van PV-producten en PV-technologie op een hoog niveau.

Het programma bestaat uit korte-termijn projecten, waarvan de resultaten al snel zichtbaar zijn, en een aantal ambitieuze lange-termijn-projecten, die in de toekomst nadrukkelijk het duurzame en ondernemende imago van Friesland in de wereld mede kunnen bepalen.

Het Cartesius Instituut te Leeuwarden, instituut voor duurzame innovaties van de drie Nederlandse technische universiteiten, faciliteert de activiteiten van Fryseps.

SUSTAINABLE INNOVATION

April 4, 2007

First Frisian Sustainable Innovation Contest

It is our pleasure to announce the first Frisian sustainable innovation contest. The contest will be held in August, 31, 2007. It is organized by the Cartesius Institute, Institute for Sustainable Innovations of the Netherlands' Technical Universities (TU Delft, TU Eindhoven and TU Twente) .

The theme is "The Frisian Land". The issue is how the Frisian countryside and cities can remain sustainable for people and nature. The issue addresses questions such as: what new products and services can keep the Frisian region attractive for living, working and travelling, what novel activities can maintain balance of natural qualities and economic development, how to use regional qualities for sustainable innovations and so on?

This year the floor will be given to young designers from academic design schools. If you want to participate please contact Wini Weidenaar for more information (wini@ww-pr-organisatie.nl).

**A flourishing future for
the Frysian country side?**

Department of Economics, Recreation and Tourism

SUSTAINABLE INNOVATION

SUSTAINABLE INNOVATION

Who will join us from **Lisbon to Gothenburg?**

The "**Lisbon to Gothenburg sustainable vehicle race**" !!

A race across the continent from economic start to sustainable finish
for solar powered and other sustainable vehicles.

Promoting sustainable innovation to a large public

Approaching the greenhouse effect in a challenging way;

Showing new innovative transport opportunities:

Drawing attention to the European Union funding programmes;

With events ranging from culture or sport to technology along
a route of about 3100 kilometres.

Early summer 2009

Join us in this race or take the opportunity to organize an event along the route !

Interested ?

Please contact Hans van Meerendonk from the province of Fryslân,
the Netherlands.

Experiences

28 idea killers...

1. Ja, maar
2. Dat bestaat al!
3. Kan niet.
4. Dat is niets voor onze klanten.
5. Laten we realistisch blijven.
6. Te duur.
7. Dat is niet logisch.
8. Er is meer onderzoek nodig.
9. Geen budget.
10. Geen fouten maken
11. De directie zal er niets voor voelen.
12. Ik ben niet creatief.
13. Niet mijn verantwoordelijkheid.
14. Als het echt een goed idee was, hadden anderen het allang geprobeerd.

28 idea killers...

15. Dat is een te grote verandering.
16. De oudere garde zal het niet gebruiken.
17. Te lastig om te beheersen.
18. We doen het al tijden op deze manier, waarom anders?
19. Daar hebben we geen tijd voor.
20. De markt is nog niet rijp.
21. Daar zijn we te klein voor.
22. Laten we de zaak wel reëel blijven bekijken.
23. Laten we het in beraad houden.
24. We hebben het ook zonder kunnen rooien.
25. Dat werkt misschien ergens anders, maar niet hier.
26. Dat staat al in onze toekomstplannen.
27. We zullen er later eens iemand aan zetten.
28. Sinds wanneer ben jij een expert geworden?

Competences

- Vision (IQ) - idealistic, dreamer, pioneering, outside the box
- Discipline (PQ) - focused, takes initiatives, autonomous, self disciplined, decisive
- Passion (EQ) - optimistic, hope, courageous, emphatic, inclusive, humor
- Conscience (SQ)- enthusiastic, takes responsibility, integrity, fair, inspired

As for the future, your task is not to foresee, but to enable it

Sustainable innovation

- The society which best solves its problems over time is the society that allows for the highest number of trials
von Hayek (1960) in the spirit of Joseph A. Schumpeter
- The ability of renewal explains growth and that renewal occurs where the implementation of experiments is facilitated
Historians Nathan Rosenberg and L. E. Birdzell Jr. (1991) in their attempt to explain the West's road to success.
- Flexibility presupposes a large dissemination of power and resources within the organization. (a decentralized structure makes the best use of people's abilities)
Philip Klein and Edythe Miller (1996) to illustrate the importance of flexibility for the adoption of new ideas and technological change.

SUSTAINABLE INNOVATION

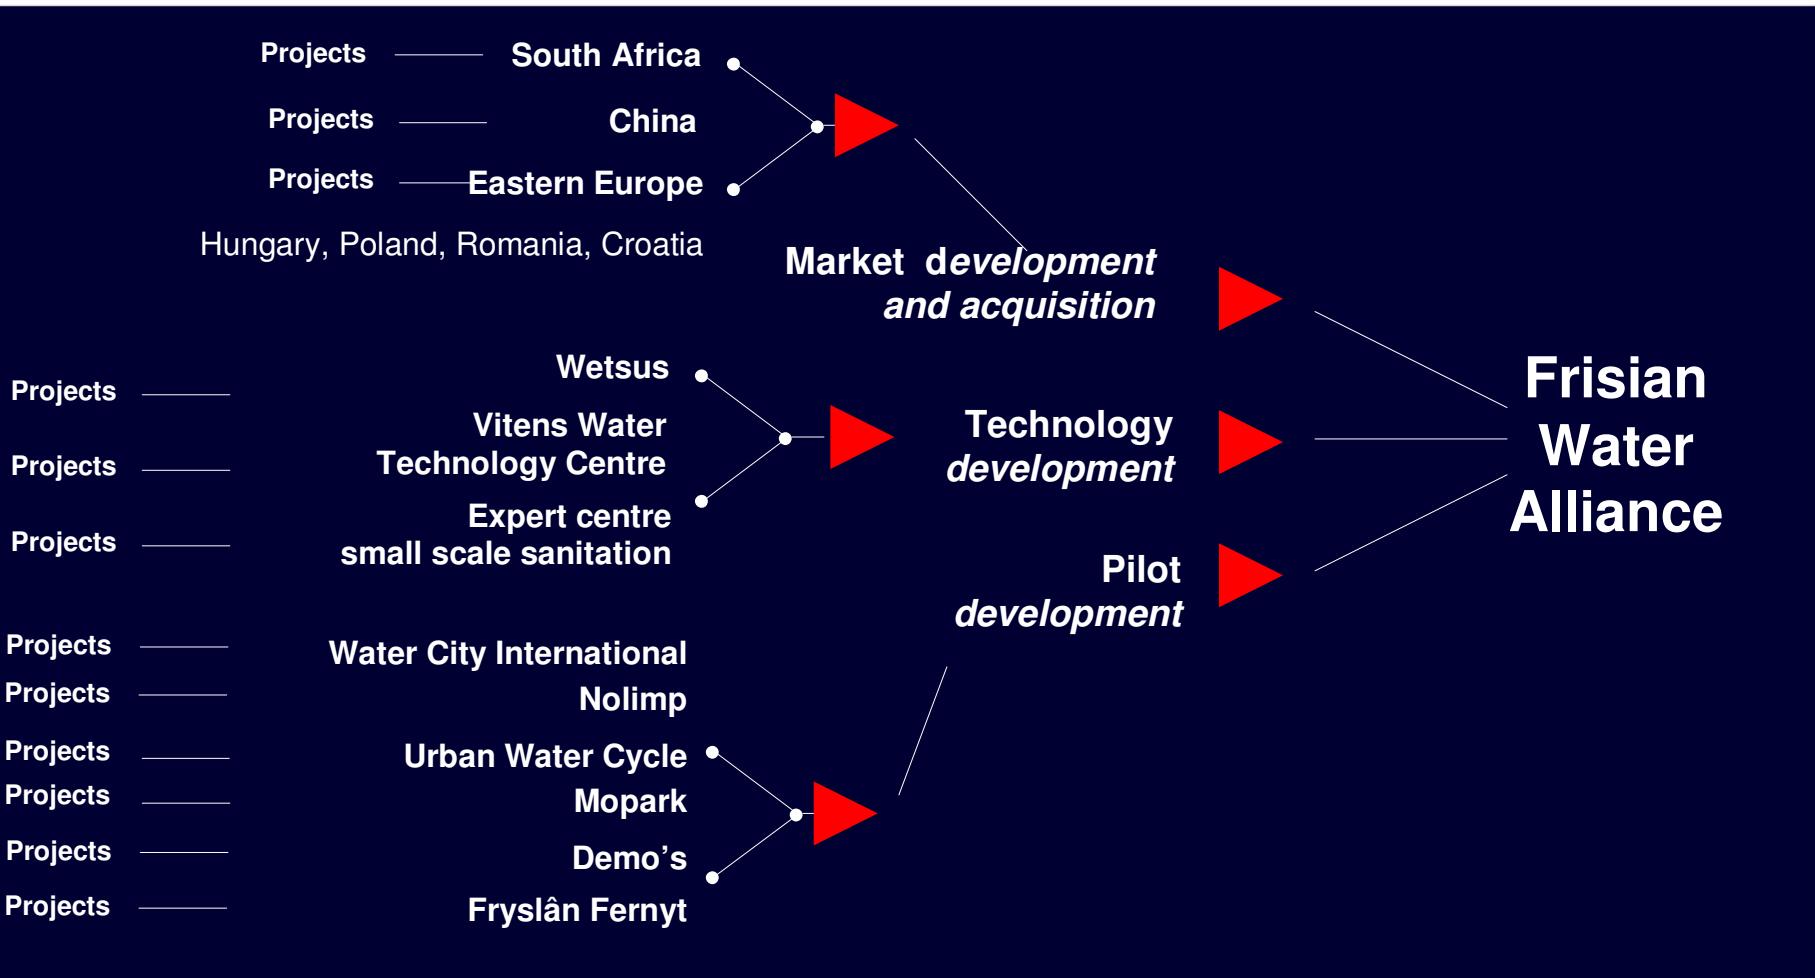

As the births of living creatures at first are ill-shapen
so are all innovations which are the births of the time

Francis Bacon

I think all great innovations are built on rejections

Louis Ferdinand Celine
