….and sharing the same challenges

DC NOISE objectives

1: To raise awareness amongst both private and public actors and involve these actors in the process.

2: To develop a better understanding of and find solutions for the consequences of demographic change in three themes:

- labour market
- services provision
- innovative housing

DC NOISE objectives

3: To implement strategies, demonstration projects (26!), transnational pilots and concrete actions to deal with these consequences of demographic change.

4: To communicate the outcomes and best practices of the DC NOISE project in such a way that also other regions in the NSR will be aware of the urgency and the consequences of demographic change in their policies and actions.

How to monitor the activities, output and results?

- Conferences, partner meetings, projectteam meetings, e-mails, telephone calls, websites....etc.
- Reports and enclosures
- Indicators! ⟶ Today!

Indicators – why work with those?

From a programme and LB point of view:

- Monitor and check the project (delivered in accordance with the application form?)
- Quantitative outputs/results of activities
- Focus (Interreg programme)
- Explanations of disparities

Also for the project partners it can be helpful...but often is not easy...

Indicators – DC NOISE tips & trics

- Ask partners to fill in the indicators, first as a concept.
  - Matches the original? If not: includes explanations?
  - Fits the report period?
  - Ask questions and make notes... A year later you face these numbers again...
- Compare with activity and finance reports.
- Ask partners to complete, including additional indicators (with explanation).
- Additional indicators? Discuss with the Secretariat.
