North Sea - Sustainable Energy Planning

Tools and methods for regional energy planning

The North Sea - SEP project is inviting COP 15 participants to learn about an EU funded project which's aim is to foster a future oriented development on regional level by an energy oriented approach. New methods and tools for regional planning and decision making will be developed with the focus on a sustainable energy planning.

This event is organised with co-funding from the North Sea Region INTERREG IV B programme (ERDF fund).
